Collabaro's most popular product features

Create

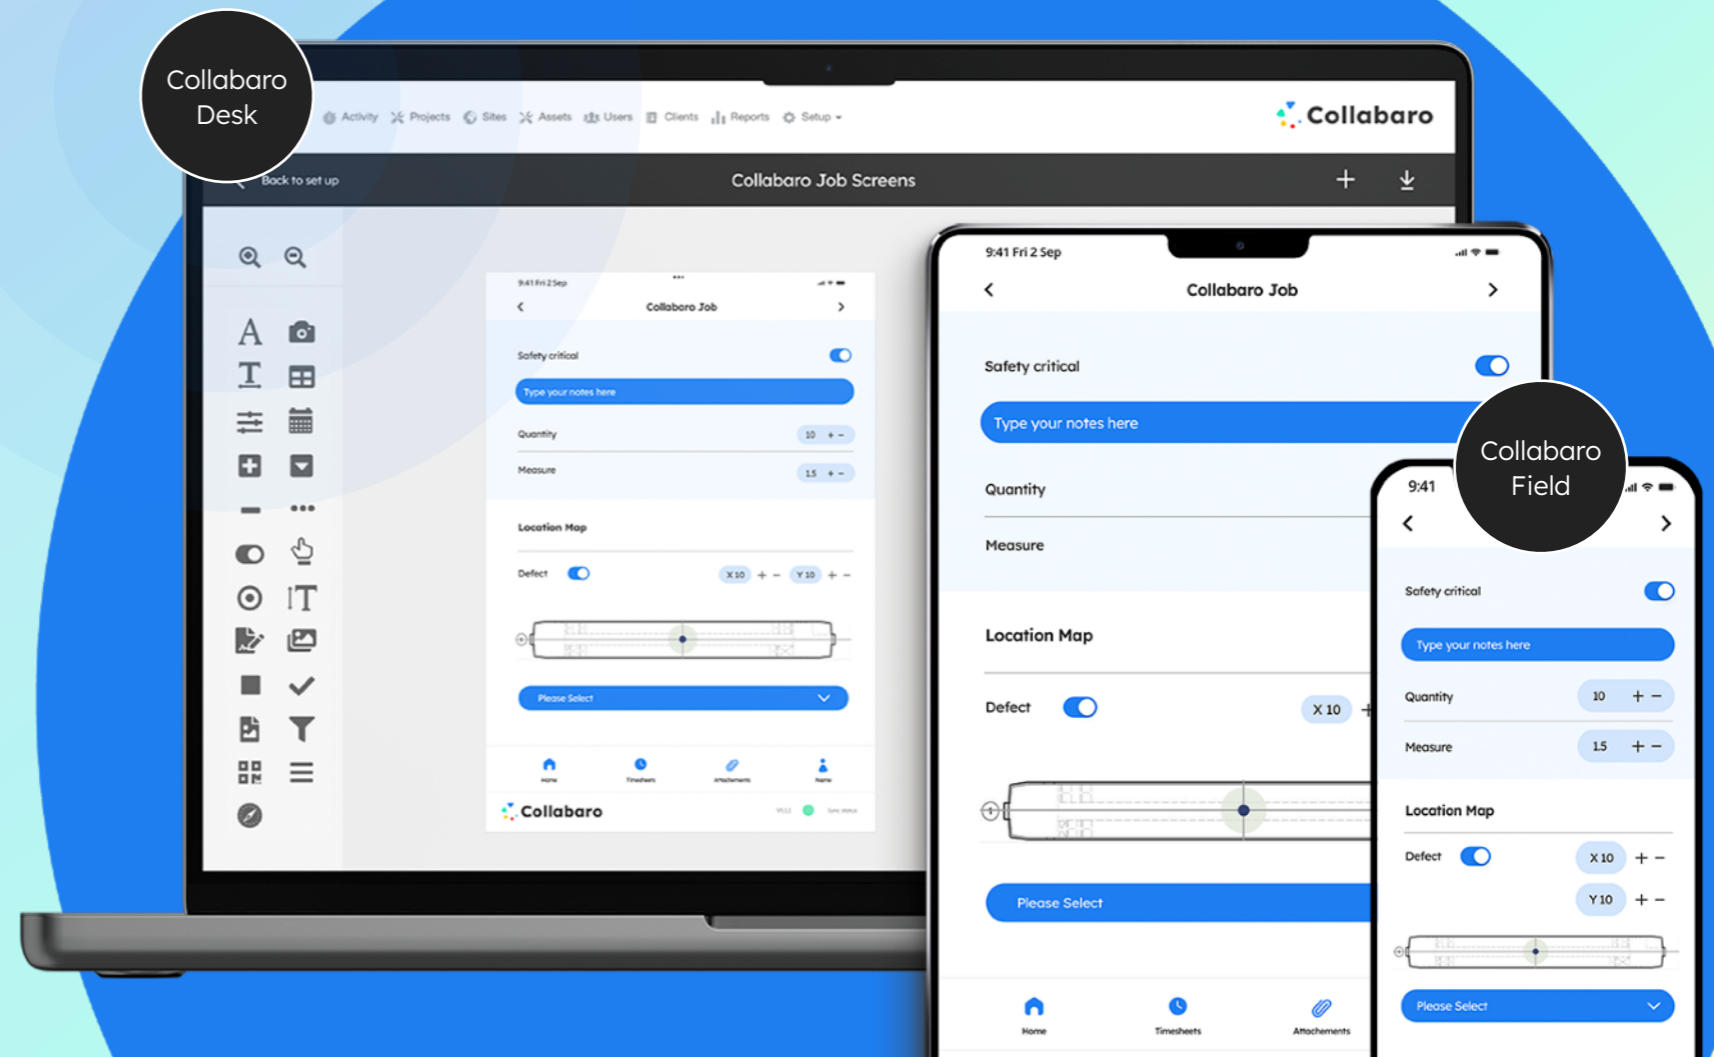

Design templates for the field, to capture data readings, images and notes

Collect

Gather data via mobile devices using the Collabaro Field App, uploaded to a secure cloud server

Deliver

Collate data and images to produce reports, designed with Collabaro Desk App, fitting client templates

Benefits explained

Work on or offline

As data from the field is collected, all images, notes, task statuses and parts records are stored locally, automatically updating the web app via wifi or mobile data. If the device has no signal the data will remain local until a connection is re-established, providing great location flexibility.

Real-time data capture

Get real-time access to asset test statuses and historic inspection data. Maintain data accuracy by continual updates between the field and desk app. Real time information empowers your team to make confident decisions with a clearer operational overview.

Automated reporting

Field data is automatically inserted into the correct section of a pre-formatted, custom, report template. The outcome is a sophisticated client report produced as a printable PDF in minutes. Reports no longer need to be written by field personnel, greatly improving their performance, time management, overall job satisfaction and error reduction.

Compliance assurance

Collabaro ensures that your field service professionals follow compliance-driven, pre-work checklists and risk assessments. A digital signature is required to acknowledge their understanding and confirm they are fit and well enough to perform their daily duties. Only once the individual has completed and signed the mandatory compliance checklists will they be able to continue with their main tasks. This data is recorded and stored alongside the job data, providing you with an accurate safety and compliance audit trail.

System integrations

Connect your existing ERP, CRM or finance system using our REST API, and benefit from seamless integration, faster workflows, and up-to-date information across all your business tools.

Recent integrations include Microsoft Business Central, Microsoft Power BI (Business analytics data), Salesforce, Webfleet Fleet Management (TomTom vehicle tracking) and CiphR HR software.

Dedicated support desk

Don't get caught up in an automated call handling system, speak directly to someone with an in-depth knowledge of Collabaro to get the answers you need.

We have detailed guides, training videos and a knowledge base available within the platform. All questions are tracked, categorised and reported to compare with agreed SLAs that are reviewed regularly to ensure our service meets your expectations and needs.

Market leader Porterbrook have **grown** their business **rapidly** using **Collabaro**

Andrew Swingewood | Director of Digital Technology | Porterbrook

“Collabaro was selected as the replacement for a legacy field defect recording solution because of the flexibility it offers in creating customised, rules-based, data gathering tasks that can be used to populate template-based reports. This allows Porterbrook to generate sophisticated customer reports within minutes of an inspection being completed.

Inspectors have access to the previous defect history of any vehicle, even when a network connection is unavailable, enabling re-inspection processes, ensuring that asset devaluing issues such as corrosion or water ingress are not left to deteriorate.”

Transform your future workflow, **book a demo!**

Let us demonstrate how Collabaro could help you process more jobs without increasing back office administration.

If you are ready to take the first step on your journey to business transformation, **simply get in touch.**
