TECHNOTRACK
ENGINEERING

INTRODUCTION

At Technotrack Engineering Ltd we pride ourselves in supplying high quality and reliable services to the UK railway sector.

The company has an experienced team, who has been involved in delivering major projects for some of the UK's largest companies, including Alstom, Kier, Costain and Network Rail. We feel this puts us in a great position when supplying quality, trained staff for various roles.

Our face-to-face approach helps us to work alongside our clients, allowing us to have a clear vision of their needs. With our tag line 'Installing with Pride on Every Project', our aim is to supply our clients with fully, self-sufficient staff who constantly deliver the highest quality of installation.

The company is an approved UK RISQS supplier and achieved a maximum rating in our latest audit.

The Company is also a registered member of CIRAS, the independent Confidential Reporting scheme for transport across the UK.

ENHANCING OUR SERVICES

- ✓ All of our staff are supplied with a company vehicle, a full range of job specific calibrated tools & meters and any installation materials that may be required.
- ✓ Our office team are fully focussed on making sure that we manage fatigue. We do this by utilising local staff where possible and providing hotels for any staff both before and after shifts.
- ✓ As a company we value our staff and understand that they are our strongest asset. We give our staff ownership of projects and encourage them to build internal relationships with our clients.
- ✓ Our management team all have vast experience of major Rail projects within the industry across multi disciplines meaning that we can allocate the correctly skilled staff to meet your project requirements.

- ✓ Technotrack are keen to participate in regular site meetings with our clients. We believe that communication and collaborative working is the key to an effective client relationship and ensures that projects are completed on time and within budget.
- ✓ Staff have 24-hour access to the comprehensively stocked Technotrack Store Room. This means that any emergency or last-minute equipment requirements on site, can be accommodated.

We are always looking to enhance our workforce with young, skilled railway technicians and by providing a comprehensive training programme and management oversight we believe we can offer a clear advantage to our team.

This ultimately means that the team you will gain will be knowledgeable, competent and experienced with a forward-thinking approach and will be keen to exceed your expectations. Please contact us to discuss your project requirements.

TRAINING

At Technotrack Engineering Ltd we are committed to our staff training programme and continuously monitor and review their requirements. To maintain our high standards, a senior member of the team regularly carries out site visits and competency assessments.

As a company, we believe in the importance of supplying qualified staff to our clients. As a business working within the ever-evolving railway industry, we fully appreciate the demand for continuous development and training.

As part of our commitment to our trainee programme, we have recently been working in partnership with PM Training and Assessing with the Railway Apprenticeship Scheme. These apprentices are working towards achieving an NVQ in Railway Signalling Engineering and an IRSE Signalling Operative Licence. This will result in new blood entering the railway industry, again ensuring we have a competitive work force for tomorrow.

We have a dedicated training and coaching facility set up at our Ipswich based headquarters,

where our people can practise their skills and seek guidance on best practice installation and

testing activities. This facility also enables us to bench mark the quality standards that our clients can expect when using our services.

We also have an in-house IRSE Workplace and Competency assessor who ensures all our staff are IRSE licenced or working towards their licence.

MANAGEMENT TEAM

Christopher W. Stutter – Chairman

I have been involved within the railway signalling industry for in excess of 30 years and as such have a large bank of experience to draw from. The industry is very progressive in nature and as such I have seen many changes during my career. My role within the company is to ensure that all of the operational and commercial needs of the business are met and I am responsible for all matters concerning safety, health, environment and quality within the company. Safety for our staff is paramount and I have implemented procedures and guidelines for all areas of the business. I look forward to the continuing development of Technotrack as the Signalling Supplier of choice for years to come.

Callum Finlayson – Managing Director

I joined the Technotrack team in 2014 as the Production Director and I am enjoying developing the company. Part of my role is conducting contract reviews to ensure the client's contractual requirements and specifications are identified and to ensure that adequate resources are available to meet those specifications prior to formally tendering for work. I have in excess of 20 years' experience within the railway signalling industry, including technical and maintenance roles, new works and major projects. I have a good technical and practical knowledge of the railway industry and of the specialised tools and equipment required. I will always try to help progress the careers of others as I believe with a strong team around you, you can move forward to achieve your goals.

Faye Hempstead – Company Secretary

I have been working at Technotrack since 2015 and have enjoyed every minute of it. Technotrack is committed to both its client and staff and has a fantastic approach to building new and developing existing relationships. I am the Sentinel Coordinator and the Company Secretary which means my role is varied and interesting with no two days being the same. Among other things, I am responsible for the compliance department including document control and audit preparation, the financial side of the business including invoicing, payroll, payments and banking, the procurement of products and services for the office, I look after the motor vehicle fleet and the general office administration.

TECHNOTRACK ENGINEERING

MANAGEMENT TEAM

Adrian Fisher – Head of Signalling

I joined the Technotrack Team in August 2020 as the Head of Signalling. My Railway Signalling career started in 2002 and has seen me engaged in all aspects of Signal engineering from, track renewals, new works project schemes and maintenance. I have extensive technical, safety and management training. I have gained experience from various signalling roles throughout my career as well as an appreciation of multiple railway and civil engineering disciplines including, track, OHLE, electrification, HV, LV, stations, tunnelling etc. My Role at Technotrack is to ensure compliance with technical standards, our staff are competent to undertake the tasks that they perform and are informed of all the current standards, specifications and best practise.

I pride myself in being organised, approachable, customer focused a good leader of people and always striving to achieve more.

Brett Nelson – Points Divisional Manager

I joined Technotrack in April 2021 as the manager of the newly formed points division. It is an exciting opportunity for me to put my knowledge and experience into building a division that will succeed the success I've seen on my previous projects. I have been extremely fortunate to have been involved in a wide variety of points projects both in the UK and overseas throughout my career. From the planning to the G110 testing of niche jobs, which include multiple points conversions new mechanical rodding runs and double slip renewals. Over the last 2 years I have successfully planned and executed over 80 points renewals for a variety of clients. Most notable work being leading teams for Network Rail implementing a preventive approach to maintenance to great effect, eliminating all repeat failures and RCM alarms on POE for Network Rail Saltley depot.

I look forward to seeing what we can achieve together with the Team at Technotrack.

TECHNOTRACK ENGINEERING

TESTIMONIAL

Technotrack Services

"As Technotrack have now supported Kier in two signalling projects, Hereford signalling enhancements and Balcombe Bi-Directional Signalling, plus several smaller packages of work I thought that it may be fair to offer my opinion of the service provided on these works.

The support we have received to date has been first class from both the staff on the ground and the backup team in your office.

From day one it was clear that Technotrack intended to offer more, as part of its service, than just labour supply.

Communication has been excellent, and the involvement of senior staff in attending Kier site and safety meetings, undertaking safety site checks on your own staff, and generally making sure that your staff were fully equipped was very welcome.

The staff Technotrack supplied were always very competent and matched the skill levels I had requested.

They were fully equipped to undertake the work and had a positive attitude.

As well as working in a competent manner the rapport developed with the Kier site staff enhanced the effectiveness of the teams as a whole.

I would have no hesitation in employing the services of Technotrack again, or, recommending their services to other parties.

I look forward to working with you again soon."

Paul Adams
